## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-18 and 24, drawn to an adenovirus vector for the manufacture of rAAV (recombinant AAV) comprising the AAV rep gene wherein the AAV p5 promoter is deleted upstream of the rep gene and methods of producing rAAV using the adenovirus vector.

Group II, claim 19-21, drawn to a lysate and purified comprising rAAV produced by the method of Group I.

Group III, claims 22-23, drawn to methods for transient or stable gene transfer using the rAAV of Group II.

PCT Rule 13.2 requires that unity of invention exists only when the shared same or corresponding technical feature is a contribution over the prior art. The inventions listed as Group I-V do not relate to a single general inventive concept under PCT Rule 13.1 and each has a different special technical feature not shared by the remaining groups.

The “special technical feature” of Group I is an adenoviral vector comprising the AAV rep genes wherein the p5 promoter is deleted upstream of the AAV rep gene which is shown by Ciliberto et al US 6,521,426 B1 to lack novelty of inventive step and does not make a contribution over the prior art. Ciliberto et al. teach an adenoviral vector comprising the AAV rep gene under control of a regulatable promoter such as T7 or a tissue specific promoter (see e.g. column 3, line 30-31 and column 4, line 6-12). The rep gene is void of the p5 promoter (see e.g. column 8, line 56-58). Moreover, this technical feature is not present in the rAAV of Groups II-III.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provision of MPEP 821.04. Process claims that depend from or otherwise include all the limitations of the patentable produce will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendment submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirements for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 USC 101, 101, 103 and 112. Until an elected product claim is found allowable, an otherwise proper restriction between product claims and process claims may be maintained. Withdrawn process claims that

are not commensurate in scope with an allowed product claim will not be rejoined. See “Guidance on Treatment of Product and Process Claim in light of *In re Ochiai*, *In re Brouwer* and 35 USC 103(b),” 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 USC 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP 804.01.

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
